The Changing Landscape of Banking and Finance

Story by Intern · 3d · 2 min read

The financial world is shifting, shaped by job stability, market trends, and consumer behavior. Banks influence personal finance and economic growth, but access to financial services is uneven. Married individuals and those with higher education find it easier to secure loans, while self-employed individuals and students face more challenges due to fluctuating incomes.

Spending and saving habits change throughout the year. Financial activity peaks in May, likely due to tax refunds and mid-year investments, while balances dip toward year-end with increased holiday spending. While many people manage their money well, others struggle with savings and increasing debt.

Debt remains a concern, with £5.61M in unpaid loans, though most borrowers successfully repay, totaling £55.98M. This highlights the need for better financial literacy and more flexible repayment plans to support struggling borrowers.

Employment plays a key role in financial stability. Workers in management, administration, and services have better access to credit, while freelancers and gig workers face barriers despite financial responsibility. Banks must rethink lending policies to accommodate evolving work structures and income streams

To keep pace with economic shifts, banking services must become more inclusive. Expanding digital banking, offering financial education, and adjusting loan policies can ensure better financial access for all. As trends evolve, adaptability remains key to building a stable and inclusive financial future.
